Python & AI Engineer with 4 years of experience in AI-focused startups, specializing in data pipelines, computer vision, and autonomous systems.

WORK EXPERIENCE

Python Engineer & Data Scientist - Newstream Ltd / 2024 – Present

- Architected a **JSON-driven, node-based pipeline** for modular data scaling.
- Developed **NumPy/Pandas nodes** to analyze 26-point Halpe keypoint datasets.
- Engineered **SDK diagnostic logic** to analyze and extract KPIs and movement errors.
- Built **OpenCV and Matplotlib** tools to generate diagnostic graphs and video overlays.
- Automated model training datasets by identifying edge cases and high-quality examples.

Python & Robotics Engineer - 634AI / 2022 – 2024

- Developed a **State Machine Design Pattern** for an autonomous forklift and refactored the codebase for maintainability.
- Integrated a **Pure Pursuit algorithm** to achieve smooth and accurate path following.
- Incorporated a **Pallet Detection Model**, empowering the forklift to navigate autonomously towards identified pallets.

EDUCATION

Azrieli College of Engineering - B.Sc, Software Engineering

2018 - 2022, Grade Average: 93 Jerusalem

Relevant courses: Advanced data structures and algorithms; Applied computer communication; Machine learning; Parallel Programming.

SKILLS

Programming Languages:

Python – OpenCV, Pandas, NumPy, Matplotlib, Flask; Docker; Git; Vue; Node.js; JavaScript; HTML/CSS
